PRAVOKOTNO OHIŠJE FILTRA RECTANGULAR FILTER BOX

OPIS:

Ohišje za vrečasti filter, ki se pritrudi direktno na prezračevalni kanal.

KONSTRUKCIJA:

- ohišje
- 2 pravokotni priključni odprtini na vsaki strani
- pokrov, ki se zapira z vijaki in omogoča enostavno menjavo filtra
- na željo kupca se ohišje izolira. Med dve plasti pocinkane pločevine se vstavi 30mm visoko plast mineralne volne

MATERIAL: pocinkana pločevina

DODATKI: vrečasti in kasetni filter

MONTAŽA: s prirobnicami

DESCRIPTION:

The FK rectangular filter box is designed for bag filters and can be connected directly to the duct system.

CONSTRUCTION:

- casing
- 2 rectangular connection openings on each side
- cover, which is closed by screws, allows changing of the filter
- upon customer's request we insulate the casing. A 30mm mineral wool is inserted between two layers of galvanized sheet metal

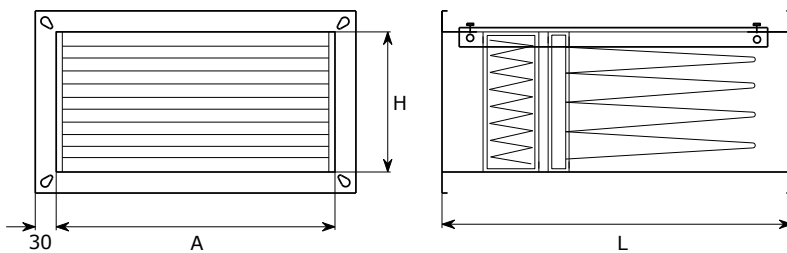

MATERIAL: galvanized sheet metal

SUPPLEMENTS: cassette and bag filter

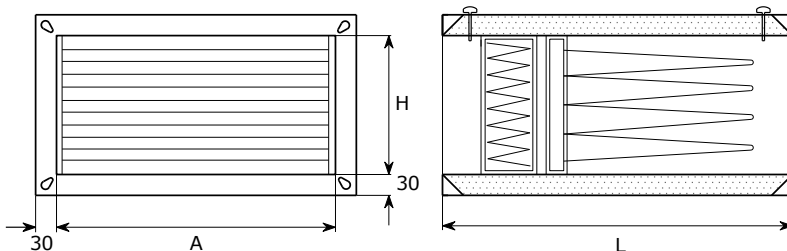

MONTAGE: with flanges

DIMENZIJE / DIMENSIONS:

Neizolirano ohišje filtra / Non insulated filter box

Izolirano ohišje filtra / Insulated filter box
